

HYCON HRD28X ROCK DRILL

LIGHT, POWERFUL AND EFFICIENT

HAND DRILLING UP TO 6 M DEEP

VIBRATION REDUCED HANDLE

PRODUCT FEATURES

The HYCON HRD28X is a high-performing handheld rock drill designed for the most demanding drilling applications in granite and concrete up to 6 meters of drilling depth.

Using standard integral drill steel with air-flushing from an external compressor and a high-performing hydraulic impact and rotation unit makes the HRD28X a lighter, more powerful, and more efficient rock drill.

The HRD28X rock drill is ideal for anchoring holes and blasting or splitting holes measuring \varnothing 25-50 mm when drilling

deeper with maximum air flushing.

Combined with a compressor of your choice, this rock drill is made for underwater drilling, making it the professional divers' rock drill choice no. 1.

Simply connect it to one of HYCON's compact hydraulic power packs and a compressor and start drilling.

Consult one of our salespersons for recommendations for deeper drilling.
