Arix Diamond & Electroplated Diamond Wire

3 TYPES OF DIAMOND WIRE

THE WORLD'S LEADING DIAMOND TOOL BRAND FOR A REASON.
IT ACTUALLY DOES CUT FASTER & LAST LONGER

Free Swivel Connector with every 25M of wire

£2.50 OFF per Meter When ordering 50M+

Wire sawing is an all-weather construction/demolition method that does not damage the remaining structures with low noise/vibration, able to cut awkward shapes with the added bonus of being able to be used in confined spaces or under water.

ECO Wire has been designed to not only match, but beat others cheap wire! In tests it cuts not only just as fast but also lasts 30% longer.

Arix 2nd Generation Diamond Wire is designed to effectively cut all different types of concrete and reinforced concrete giving you both speed when cutting and significantly prolonged life. Perfect for buildings, bridges and large structures. There are 40m x 10.5mm beads per meter, with Arix auto array technology ensuring the diamond grits are evenly placed throughout resulting in faster cutting and longer life.

We also stock Arix Electroplated wire which can be used dry or wet, and recommended when directly cutting steel or highly reinforced concrete.

Diamond Wire
