# Wet Diamond Drills

## The UK's Largest Range

We manufacture our own core barrels and stock the largest range of diameters and lengths in the UK; from 9mm in diameter right up to 2000mm; in 300mm, 450mm, 600mm, 1m, 1.5m and 2m as standard lengths but these can be cut to any size. Non stock sizes can be made or sourced from our suppliers within 7 days.

We also carry tube from 9mm to 160mm so have the ability to make drills up to 6m long. This gives us the unique ability to produce the size drill you want, at the length that you need, when you need it. So if it is not listed within this price list please give us a call or check our NEW 'Bespoke Drill Calculator' on our website for an instant price.

**Standard Back End by Diameter:- 10-45mm = 1/2" BSP | 45mm+ = 1 1/4" UNC**

## Blade Pricing Offers - Simple and Clear Price Promises

We have taken the decision to help our valued customers with managing rising costs to make all Blades part of our buy any 9 Blades, get a 10th Free\*. We also now match any like for like quote on Floor or Wall saws of the same quality & specification, thought this is not in conjunction with any other offer.

We have also re-introduced an offer on our Arix G1 Blades, both Floor and Wall saws, when you buy any 3 blades 600mm or over you will get an extra 5% off your standard discount.

## Re-tips

### Helping you save money and reduce your carbon footprint

Due to the nature of Diamond drilling, you'll know, even though we provide greater longevity than our competitors, they don't last forever. There are many factors which contribute to the wear of segments, the age and construct of surfaces being drilled can lead to varying levels of deterioration.

But! This unavoidable usage of a consumable doesn't need to be costly! Instead of purchasing brand new Drills, simply get our team to re-tip your existing barrels purchased from ourselves or elsewhere. See the prices next to the new drill ones in this guide or scan the QR code above to go to our online Re-Tip Calculator.

This can be done for anything within our Arix+, Arix, Arix 'X', Lightning, Black or Green ranges, depending on your Diamond Drilling needs and budget.

And what's more, you will increase your business's sustainability and **save up to 50%**, just by recycling old barrels.

Simply return your barrels to us or arrange a collection and we will have them completed by the next working day.

Alternatively, we can perform this whilst you wait.

## About our Product Range

### Full Range

#### Wet Drills

- 10mm - 1.5M in stock
- Any length you need
- Arix+, Arix, Arix 'X', Lightning
- Black & Green Segments
- 1/2" BSP or 1 1/4" UNC

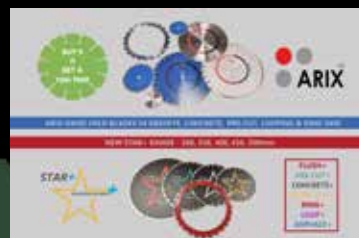

#### Floor Saw Blades

- 350mm - 1.5M in Stock
- G1 - FX20, FX40, FX60, FX70 & FX90
- ARIX X - FX20, 30, 40, 50, 60, 70 & 90
- and in 4mm, 4.4mm & 4.8mm
- 25.4 and 60mm Bore's

#### Wall Saw Blades

- 600mm - 2M in Stock
- WX30 or WX70 Depending on Saw HP
- Original G1 Blades

#### Hand Held Blades

- Arix, STAR+, HDP and Pro Spec's
- Buy 9 get a 10th FREE
- 105, 125, 150, 180, 230, 300, 350, 400, 450 or 500mm

#### Diamond Looping Blades

- Arix & STAR+
- 300mm, 450mm & 600mm
- 5mm, 8mm, 10mm, 13mm & 15mm thicknesses

#### Dry Drills

- 20-200mm in Stock
- Slotted as Standard, but available Un-slotted in XDP or Classic Corrugated
- 1/2" BSP Standard Back End

#### Granite/Silenced Blades

- Arix of STAR+
- 125mm, 140mm, 150mm, 180mm, 230mm, 300mm, 350mm, 400mm, 500mm & 600mm
- Silenced reduce noise up to 50%

#### Diamond Wire

- Top Quality Arix Diamond Grit
- 10.5mm Diameter beads
- Discounts for orders of 50m
- Free Swivel Connector with every 25m

#### Asphalt, Pre-Cut & Ring Saw

- Specially designed for life & speed
- Asphalt blades in 350mm, 450mm, 600mm, 750mm & 900mm
- Ring Saws in 360mm, 400mm & 450mm

#### Accessories

- Male/Female/Hilti/SDS/SDS Max Adaptors
- Extension Rods
- M12/M16 Drop in Anchors & Bolts
- SDS & SDS Max Carbide Drill Bits

- Available in:- 25, 30, 37, 52, 65, 78, 107, 152, 200, 250 & 300
- Arix, Arix 'X', Lightning, Black, Green, XDP Turbo & Classic Dry
- Crowns from 10mm-50mm

#### Barrels

- 1/2" or 1 1/4" Back End
- 9mm to 1500mm in Stock
- Cut to any length you require
- Bespoke sizes available to order

# Product Range

## WET DRILLS

- Our latest Premium segment with more diamond in the roof top tip and throughout the body of each.
- Ultimate Cutting Speed due to Arix Auto Array Technology
- 15% longer life due to enhanced bond

- Suitable for the hardest of concrete with high rebar content
- Ultimate Cutting Speed due to Arix Auto Array Technology
- The Premium Industry Leader

- The tough baby brother to Arix
- Arix Auto Array segment with a Turbo design for speed
- Eats through hard aggregate concrete with high rebar
- Perfect when budget dictates

- Our mid-range Auto Array Segment
- Popular for industry professionals when stitch drilling
- Fast cutting but slightly less life than our Arix range

- Pointed 8.5mm Segments, long lasting through concrete, blockwork & lower rebar content
- Slightly harder bond
- Made in the same factory as Arix

- 10mm Economy Segment
- Dimpled design to increase cutting speed
- Best suited to concrete with light rebar or softer aggregate

**WE'VE COMPARED OUR SEGMENT VS. EACH OTHER SO YOU KNOW WHAT WILL BE BEST FOR YOUR JOB**

									Competitor
Granite									
Hard Clay									
Hard Bricks									
Reinforced Concrete									
Flint

# ARIX Technology

The Original Auto Array Technology

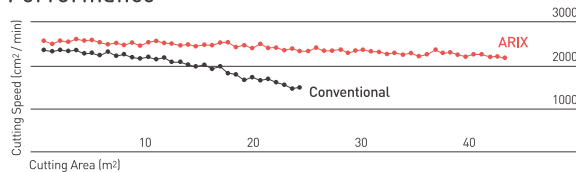

## The basic Theory of ARIX Technology

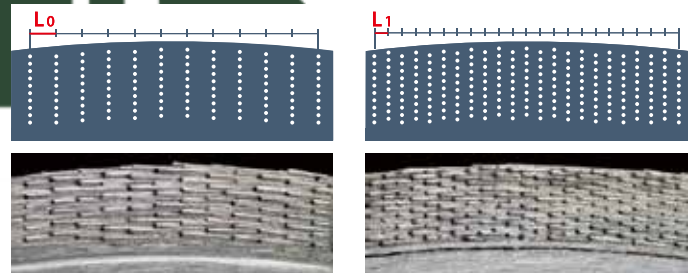

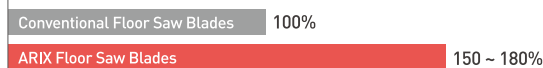

It is almost impossible to find the perfect solution for diamond tools that is best for every case, situation and material. There are just too many variables; some jobs need speed, some need life, we do though offer the best balance out there in all our blades. However, what is possible is to find a perfect solution for each case.

Arix technology is to place the diamond grits precisely in three dimensional patterns and to deliver the best performance to you in all cases, then offering various bond strengths to suit the power of the machine been used.

### Performance

### Tool Life

The above diagrams show how the individual diamond grits can be controlled 'L0' being wide and 'L1' showing them in a narrow alignment.

## G1 Arix Floor Saw Blades

The G1 Arix Original "Premium Diamond Blade", the first using auto array technology. Despite continuous innovation since it both remains one of our most popular blades and more importantly STILL one of the best available in the world for cutting concrete and reinforced concrete quickly and efficiently.

With 5 different bonds and diameters from 600mm to 1.5m available in stock you know there will always be the right floor saw for the job.

From saw blades for low power 3 phase electric saws right up to the largest diesel machines, we can match the material being cut to the correct machine giving you the most cost-effective method to complete the job.

All available with a 25.4mm bore & FX20, FX40 & FX60 with a 25.4mm or 60mm.

## G1 Arix Wall Saw Blades

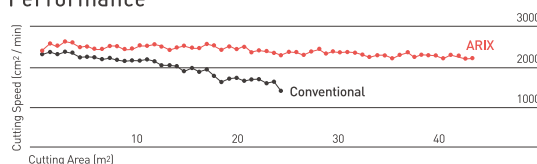

### WX30

The Arix WX30 Diamond Blade is for lower power 3 phase Wallsaws/Tracksaws with power of up to 20Kw  
Available with a 60mm or 25.4mm Bore

The premium ARIX segments specifically tailored and designed for ultimate performance when track sawing, perfect for concrete and reinforced concrete.

#### Performance

#### Tool Life

### WX70

The Arix WX70 Diamond Blade for Hydraulic Wall saws/Tracksaws and 3 Phases with power over 20Kw  
Silenced reduces noise by up to 50%

We have 2 different bonds, WX30 and WX70 to suit the machine you are using, ensuring the right amount of diamond is exposed as you cut.

Diameters from 600mm to 2m available in stock you know there will always be the right floor saw for the job.

Available in Standard or Silenced, WX70 with 60mm Flush Cut hole centres or WX30 with a choice of 60mm Flush Cut or 25.4mm bore.

When  
ordering 50M+**

Wire sawing is an all-weather construction/demolition method that does not damage the remaining structures with low noise/vibration, able to cut awkward shapes with the added bonus of being able to be used in confined spaces or under water.

ECO Wire has been designed to not only match, but beat others cheap wire! In tests it cuts not only just as fast but also lasts 30% longer.

Arix 2nd Generation Diamond Wire is designed to effectively cut all different types of concrete and reinforced concrete giving you both speed when cutting and significantly prolonged life. Perfect for buildings, bridges and large structures. There are 40m x 10.5mm beads per meter, with Arix auto array technology ensuring the diamond grits are evenly placed throughout resulting in faster cutting and longer life.

We also stock Arix Electroplated wire which can be used dry or wet, and recommended when directly cutting steel or highly reinforced concrete.

## RE-TIP Collections/Returns

Our sales reps can collect your used barrels from you whenever they're in the same area, however this service may take longer during busier periods. If time is of the essence, simply box up your Diamond Core Drill Barrels, provide us with your dimensions and weight, so we can arrange DPD to collect them from you.

Alternatively drop them off or use your own courier, and we will let you know as soon as we receive them.

If you return them to us we will send them back to you free of charge.

Buy any HYCON Drill, Cut Off Saw, Ring Saw or Power Pack and we will increase your discount by 5% for good\*

What's more, in addition to this, you will also get 10% off all blades under 600mm

## HYCON CORE DRILLS

### HCD25-100    HCD50-200

For drilling with cores    For drilling with cores

25mm-100mm

50mm-350mm

Each Only **£1,495.00** +VAT

### Features & Benefits

- Extremely powerful & easily manageable** – With higher torque than any electric alternative with no mechanical clutch
- Low weight so perfect for any handheld coring, with Low vibrations** – So can drill larger diameters by hand than electric alternatives and also protects the operator
- Built in hydraulic torque relief valve, so stops immediately if core bit jams** – No kick back when jammed due to hydraulic torque control, will start again when operator moves the core bit free in the bore again.
- Variable rotary speed in lever** – Slow and easy drill start
- Handles and all surfaces not heated by oil** – Protects the operator
- Not affected by slurry or dust** – Vertical upwards drilling possible
- Underwater drilling no problem** – no modification needed
- All parts run in oil and no wear on "clutch"** – Low service & Maintenance costs

### Features & Benefits

- Able to cut all types of concrete, steel, brick, asphalt, etc
- Cuts in the most extreme conditions inc. under water
- Light but built to last, Unaffected by water and dust
- All parts run in oil lubrication for extended product life
- Saw stops automatically if the blade jams
- Can be used for vertical or horizontal cutting
- Built in water line runs through body/motor = extra cooling
- Great for cutting openings for doors and windows
- Safety trigger with hydraulic quick stop valve (8-9 sec's to stop of blade rotation) which creates counter pressure at the moment as the safety trigger is released.
- Hycon HCS cut-off saws have the highest power efficiency

Buy any HYCON Drill, Cut Off Saw, Ring Saw or Power Pack and we will increase your discount by 5% for good\*

What's more, in addition to this, you will also get 10% off all blades under 600mm

## HYCON RING SAWS

### Features & Benefits

- Deep 300mm cutting depth
- Cut through Concrete, rebar, brick and stone with ease
- High power output, running up to 18HP
- Light weight Ergonomic design which increases operator comfort and Balance
- Water supply through motor body for increased cooling
- Hydraulic motor and gear box fully protected with built in hydraulic relief valve
- Extremely easy to change blades
- Low vibrations and built in safety trigger
- No exhaust gas while working
- Works underwater due to closed system design
- Heat insulated body, front handle & main rear handle

### Hycon Cart for Cut Off Saw with Water Kit

**£845.00**  
+VAT

Buy any HYCON Drill, Cut Off Saw, Ring Saw or Power Pack and we will increase your discount by 5% for good\*

What's more, in addition to this, you will also get 10% off all blades under 600mm

## NEW - HYCON POWER CHAIN SAW

## HPS08 - 30 Lpm Flow or HPS12 - 40/46 Lpm Flow

Chain and bars available in all sizes

Only **£2,895.00** +VAT

### Features & Benefits

- Integrated Motor Design - Doesn't blow seals
- Short Body - Ergonomic Design
- Flush Cut as standard
- Max Cutting depth of 630mm

The HYCON HPS12 power saw cuts all types of concrete, steel, rock, etc. The HYCON HPS12 power saw is, with its 46 LPM oil flow, built for very heavy-duty concrete cutting, and it is made for flush cutting as standard.

The body is the shortest on the market, 7 cm shorter than comparable saws. That makes the grip more comfortable for the user and allows the saw to work in confined spaces.

## NEW - HYCON HAND SAW

## Available in both Standard and Flush Cut - 20-46 Lpm

**HYCON HHS20**

**£2,095.00** +VAT

**HYCON HHS20 - Flush Cut**

**£2,095.00** +VAT

HYDRAULIC HANDSAW HHS20		CE
Item no., Standard		3030530
Item no., Flush cut		3030535
Weight [kg / lbs]		12 / 26,4
Blade dimensions Ø [mm / inch]		500 / 20
Arbor size [mm / inch]		1"-12 UNF Links
Cutting depth [mm / inch]		212 / 8,3
Oil flow [LPM / GPM]		20-46 / 5 - 12
Working pressure [bar / psi]		120 / 1740
Max pressure [bar / psi]		172 / 2500

HYCON power packs are simple to operate, and given the right pressure, you can connect and operate any of our handheld hydraulic tools from one power pack.

The High performance in a compact design make the choice of professionals and have a diverse range depending on the power you require, adaptability to different tools and weather you need Petrol to be versatile, Diesel for robustness or Electric for efficiency.

All basic instructions are shown on the front panel, making the power packs suitable for contractors as well as rental businesses.

## Features & Benefits

- Enclosed coupling drive line.
- Strong direct pump shaft fan.
- German high end gear pump.
- Protected with built in filter and cooler by-pass.
- Compact, lightweight power source for RGC, Hycon and other hydraulic tools.
- Cart-mounted with wheels and retractable handles for easy transporting and storage.
- Low noise level. Much quieter than an air compressor
- Easy & low-cost maintenance / parts.
- All controls easily accessible for safety
- Heavy duty oil cooling system.

Buy any HYCON Drill, Cut Off Saw, Ring Saw or Power Pack and we will increase your discount by 5% for good\*

What's more, in addition to this, you will also get 10% off all blades under 600mm

+VAT

Supreme components & sturdy design place the HYCON HH-series at the top of their league. These highly valued features, combined with high reliability under extreme work conditions and in any weather, let you work without any downtime.

The characteristics of hydraulics make HYCON breakers extremely powerful, the HYCON 20kg breaker has a higher performance than any 25-30kg electric or engine-driven breaker.

The HYCON HH-series is equipped with the world's best vibration-dampening system. Feel a unique operator comfort with a vibration level as low as 4.8 m/S<sup>2</sup> (HH20RV). This enables you to work effectively for eight hours per day.

HYCON breakers have only two moving parts, always running in & lubricated by the hydraulic oil. This ensures minimum wear, high reliability, and much lower operating costs.

### Features & Benefits

- Remote start/stop and stop bottom
- Start pack and regulate flow up to 60ft away
- Regulate flow from 2-12 GPM stepless
- Operates both vertically & horizontally depending on the chosen model
- Stepless start up for low amp operation
- Quieter operation than pneumatic tools – with no dusty exhaust air
- Higher impact than comparable sizes alternative platforms

### Remove effectively dust with minimum water

Comply with OSHA Crystalline Silica Sep. 2017 work practice method, work up to 4 hours without need for respiratory equipment.

Flow 0.14 -0.23 gpm @ 20-60 psi pressure. Connect to portable water supply or tap water

Water Spray cone 58 degree for optimum suppression on dust created from breaking work.

Easy access on/off valve- close to operator hand.

Fit all breakers

Buy any HYCON Drill, Cut Off Saw, Ring Saw or Power Pack and we will increase your discount by 5% for good\*

What's more, in addition to this, you will also get 10% off all blades under 600mm

## HYCON ROCK DRILL

Build in air flushing	l/min	150	150
Drill shank hex	mm	22x108	22x108
Vibration level( 3 axis)	m/sec <sup>2</sup>	13	13

HYCON Rock Drills let you work fast in granite, reinforced granite or the like – even in difficult reachable places and offers two powerful rock drills to match your specific task.

The compact design and high performance of the HRD30 give you great impact in narrow and tight workspaces. With an integrated compressor and CCW rotation, the HRD30 is the most effective handheld hydraulic rock drill on the market. Drilling up to approx. 2.4m, depending on hole diameter, this is your perfect partner for drilling anchor or splitting. A popular choice for utility works such as gas leak detection holes or anchor holes for traffic barriers in hard granite or concrete.

The HRD28X is similar to the HRD30 but without an integrated compressor. Instead, it can be connected to a separate small compressor to supply flushing air. This type of rock drill is suitable for drilling depths up to 6m with a larger diameter where more flushing air is needed. The HRD28X is also a popular and reliable choice for underwater drilling.

## HYCON PUMPS

Max. Lift head	m	28	22	14
Max solids size	mm	38	63	74

The HYCON hydraulic submersible pumps are small, powerful, and made for heavy-duty jobs.

For flooded excavations, tunnels, by-pass pumping of sewer lines, or the like. HYCON submersible pumps are designed for the high demand in the construction industry.

Thanks to the clever impeller design, the pumps are unaffected by particle sizes up to 74 mm, and wear is significantly reduced compared to other pumps.

HYCON pumps are compact in size, light in weight, with high capacity. Driven by the built-in hydraulic motor, they can run dry and be operated from compact power packs or directly from the excavator, tractor, or truck on site.
