HYCON CORE DRILLS

HCD25-100 HCD50-200

For drilling with cores For drilling with cores

25mm-100mm

50mm-350mm

Each Only **£1,495.00** +VAT

Features & Benefits

- Extremely powerful & easily manageable** – With higher torque than any electric alternative with no mechanical clutch
- Low weight so perfect for any handheld coring, with Low vibrations** – So can drill larger diameters by hand than electric alternatives and also protects the operator
- Built in hydraulic torque relief valve, so stops immediately if core bit jams** – No kick back when jammed due to hydraulic torque control, will start again when operator moves the core bit free in the bore again.
- Variable rotary speed in lever** – Slow and easy drill start
- Handles and all surfaces not heated by oil** – Protects the operator
- Not affected by slurry or dust** – Vertical upwards drilling possible
- Underwater drilling no problem** – no modification needed
- All parts run in oil and no wear on "clutch"** – Low service & Maintenance costs

Features & Benefits

- Able to cut all types of concrete, steel, brick, asphalt, etc
- Cuts in the most extreme conditions inc. under water
- Light but built to last, Unaffected by water and dust
- All parts run in oil lubrication for extended product life
- Saw stops automatically if the blade jams
- Can be used for vertical or horizontal cutting
- Built in water line runs through body/motor = extra cooling
- Great for cutting openings for doors and windows
- Safety trigger with hydraulic quick stop valve (8-9 sec's to stop of blade rotation) which creates counter pressure at the moment as the safety trigger is released.
- Hycon HCS cut-off saws have the highest power efficiency

Buy any HYCON Drill, Cut Off Saw, Ring Saw or Power Pack and we will increase your discount by 5% for good*

What's more, in addition to this, you will also get 10% off all blades under 600mm

HYCON RING SAWS

Features & Benefits

- Deep 300mm cutting depth
- Cut through Concrete, rebar, brick and stone with ease
- High power output, running up to 18HP
- Light weight Ergonomic design which increases operator comfort and Balance
- Water supply through motor body for increased cooling
- Hydraulic motor and gear box fully protected with built in hydraulic relief valve
- Extremely easy to change blades
- Low vibrations and built in safety trigger
- No exhaust gas while working
- Works underwater due to closed system design
- Heat insulated body, front handle & main rear handle

NEW - HYCON POWER CHAIN SAW

HPS08 - 30 Lpm Flow or HPS12 - 40/46 Lpm Flow

Chain and bars available in all sizes

Only **£2,895.00** +VAT

Features & Benefits

- Integrated Motor Design - Doesn't blow seals
- Short Body - Ergonomic Design
- Flush Cut as standard
- Max Cutting depth of 630mm

The HYCON HPS12 power saw cuts all types of concrete, steel, rock, etc. The HYCON HPS12 power saw is, with its 46 LPM oil flow, built for very heavy-duty concrete cutting, and it is made for flush cutting as standard.

The body is the shortest on the market, 7 cm shorter than comparable saws. That makes the grip more comfortable for the user and allows the saw to work in confined spaces.

NEW - HYCON HAND SAW

Available in both Standard and Flush Cut - 20-46 Lpm

HYCON HHS20

HYCON power packs are simple to operate, and given the right pressure, you can connect and operate any of our handheld hydraulic tools from one power pack.

The High performance in a compact design make the choice of professionals and have a diverse range depending on the power you require, adaptability to different tools and weather you need Petrol to be versatile, Diesel for robustness or Electric for efficiency.

All basic instructions are shown on the front panel, making the power packs suitable for contractors as well as rental businesses.

Features & Benefits

- Enclosed coupling drive line.
- Strong direct pump shaft fan.
- German high end gear pump.
- Protected with built in filter and cooler by-pass.
- Compact, lightweight power source for RGC, Hycon and other hydraulic tools.
- Cart-mounted with wheels and retractable handles for easy transporting and storage.
- Low noise level. Much quieter than an air compressor
- Easy & low-cost maintenance / parts.
- All controls easily accessible for safety
- Heavy duty oil cooling system.

Remove effectively dust with minimum water

Comply with OSHA Crystalline Silica Sep. 2017 work practice method, work up to 4 hours without need for respiratory equipment.

Flow 0.14 -0.23 gpm @ 20-60 psi pressure. Connect to portable water supply or tap water

Water Spray cone 58 degree for optimum suppression on dust created from breaking work.

Easy access on/off valve- close to operator hand.

Fit all breakers

Supreme components & sturdy design place the HYCON HH-series at the top of their league. These highly valued features, combined with high reliability under extreme work conditions and in any weather, let you work without any downtime.

The characteristics of hydraulics make HYCON breakers extremely powerful, the HYCON 20kg breaker has a higher performance than any 25-30kg electric or engine-driven breaker.

The HYCON HH-series is equipped with the world's best vibration-dampening system. Feel a unique operator comfort with a vibration level as low as 4.8 m/S² (HH20RV). This enables you to work effectively for eight hours per day.

HYCON breakers have only two moving parts, always running in & lubricated by the hydraulic oil. This ensures minimum wear, high reliability, and much lower operating costs.

Features & Benefits

- Remote start/stop and stop bottom
- Start pack and regulate flow up to 60ft away
- Regulate flow from 2-12 GPM stepless
- Operates both vertically & horizontally depending on the chosen model
- Stepless start up for low amp operation
- Quieter operation than pneumatic tools – with no dusty exhaust air
- Higher impact than comparable sizes alternative platforms

HYCON Rock Drills let you work fast in granite, reinforced granite or the like – even in difficult reachable places and offers two powerful rock drills to match your specific task.

The compact design and high performance of the HRD30 give you great impact in narrow and tight workspaces. With an integrated compressor and CCW rotation, the HRD30 is the most effective handheld hydraulic rock drill on the market. Drilling up to approx. 2.4m, depending on hole diameter, this is your perfect partner for drilling anchor or splitting. A popular choice for utility works such as gas leak detection holes or anchor holes for traffic barriers in hard granite or concrete.

The HRD28X is similar to the HRD30 but without an integrated compressor. Instead, it can be connected to a separate small compressor to supply flushing air. This type of rock drill is suitable for drilling depths up to 6m with a larger diameter where more flushing air is needed. The HRD28X is also a popular and reliable choice for underwater drilling.

The HYCON hydraulic submersible pumps are small, powerful, and made for heavy-duty jobs.

For flooded excavations, tunnels, by-pass pumping of sewer lines, or the like. HYCON submersible pumps are designed for the high demand in the construction industry.

Thanks to the clever impeller design, the pumps are unaffected by particle sizes up to 74 mm, and wear is significantly reduced compared to other pumps.

HYCON pumps are compact in size, light in weight, with high capacity. Driven by the built-in hydraulic motor, they can run dry and be operated from compact power packs or directly from the excavator, tractor, or truck on site.
